Integrity™ 9410 Framed pivoting shower screen system with framed door

Integrity™ 9410 represents an Australian Design Mark Award winning product, featuring a low profile twin tiered sill design.

Exceptional Value

Integrity™ 9410 provides the opportunity to indulge your imagination and create the absolute premium bathroom design at a surprisingly affordable price.

Advanced Sill Design

Contoured fully enclosed twin-tiered sill design directs water run-off into shower base. Gasket sealing system ensures maximum water resistance. Low profile design is foot-friendly, unobtrusive and reduces external splashing for a cleaner, drier and safer bathroom.

Handle Selection

An extensive range of handles are available in your choice of either clear acrylic, brass, aluminium powder coated and gold, chrome or satin chrome plated finishes. Full length continuous double-handle stiles are also available and are user friendly and safe for all members of the family.

Components

Component and design features combine to provide convenience and colour co-ordination.

- Snap Caps
- Dress Trims
- Pivot Blocks
- Anti-bacterial clear (i.e. frost) and colour matched glazing vinyl

Water Resistance

4mm spacing at the sill significantly improves water resistance and eliminates splashing.

Patented Pivot Mechanism

Utilising a stainless steel pivot pin, the **Integrity™ 9410** Shower Screen System features a 'positive close' low friction design mechanism, providing the benefit of whisper quiet and trouble free operation.

The 'lowering' effect of the design automatically reduces the gap between door and sill on door closure, which further assists with elimination of external splashing and improved water resistance.

Integrated Fixed Panel

Fixed panels (where required) are glazed directly into the outer frame, minimising the potential for residue accumulation.

Low Maintenance

Smooth contoured profiles minimise soap and residue accumulation and the need for cleaning.

Safety

Integrity™ 9410 Shower Screen Systems are glazed to comply with the requirements of Australian Standards AS2208 and AS1288.

Glass Size

Designed specifically for use with four (4), five (5) and six (6) mm toughened glass. Will accept 6.38 mm laminated glass if desired.

Design Flexibility

Integrity™ 9410 Shower Screen Systems can be designed for installation into most bathrooms. Ask your distributor for advice on a design to suit your needs.
